Information and Communication Technology Use by Staff

RATIONALE

Information and Communication Technology (ICT) has been introduced into schools allowing access to email and the Internet and other telecommunication devices. The availability of such resources provides the opportunity for schools to help students develop their full potential. ICT provides significant educational value but can pose a risk of exposure to inappropriate and offensive material and personal safety.

In accordance with the teachings of the Catholic Church, the practice of communication must be totally honest and reflect the highest standard of accountability and sensitivity to human rights and relationships.

Definition

Information and Communication Technology (ICT) means all computer hardware, software, systems and technology (including the Internet and email) and telecommunication devices in facilities that may be used or accessed from a school campus or connected to a school's communication network.

PRINCIPLES

- 1 Good Shepherd Catholic School acknowledges that the availability of access to information on a global level poses a significant risk of exposure to inappropriate and offensive material.
- 2 Good Shepherd Catholic School accepts that the use of ICT, including the Internet and email, must not infringe:
